

TO: ALL BULK INGREDIENT HAULERS

SUBJECT: FDA REGULATIONS PERTAINING TO RESIDUE PROHIBITIONS

In response to FDA's ban on Prohibited Mammalian Products in Ruminant Feeds (CFR Title 21, Section 589.2001), we are required to ask the identity of the prior load of material hauled in your trailer.

In order to document this information, we require the driver to complete the bottom of this form. This form, verifying that no prohibited materials were hauled in this trailer prior to this shipment, will be attached to our shipping documents and kept as part of our records to document our compliance with this segment of the BSE Rule regulations. After our company's personnel verify this trailer to be free of any residues, we will proceed to unload your trailer.

We apologize for any inconvenience, but this form must be completed PRIOR to unloading.

*If the prior material hauled was a Prohibited Mammalian Product, the driver's signature verifies proper clean out prior to loading the material delivered to our facility.
